

Executive Summary

Missouri Statewide Airports Economic Impact Study

Contributions to the Statewide Economy

Missouri's airport system makes valuable contributions to the communities it serves, providing access to the state 24 hours a day, 7 days a week, 365 days a year. While the main role an airport serves is to provide safe access to the local community, airports are also a dynamic part of the economy. Missouri's public-use airports are an economic anchor, contributing to each community's economic base by creating jobs and supporting a wide range of business activities.

The Missouri Department of Transportation's Aviation Section manages programs that support the operation and development of a statewide airport system. This study's analysis focused upon nine commercial service and 99 public use general aviation airports. These airports were the focus of this study's analysis and calculation of benefits. Missourians rely on and receive a return from operation of the airport system. This study measures the economic benefits attributable to this system. The study examines both the direct and spin-off contributions that an airport provides to the Missouri economy in terms of jobs, payroll, and output. Other qualitative benefits of the airport system were also identified as part of the analysis.

Missouri's airports provide a significant contribution to local, regional, and statewide economies. Major study findings include:

- The economic contribution of Missouri airports has grown 17.1 percent over the last decade despite the economic recession that began in 2007. The growth has been fueled by an increase in corporate/business aviation activity.
- Airports support unique and diversified businesses and users. These users rely on the airport system in a variety of ways, and many use Missouri's airport system daily.
- Airports directly and indirectly generated \$11.1 billion in output in 2012, or 4.3 percent of the State's Gross Product. Missouri's Gross State Product was \$258 billion in 2012.
- This output translates into 100,621 jobs—approximately one of every 35 jobs in Missouri—with employee compensation per annum averaging more than \$31,000.

Methodology for Analyzing Economic Impacts

Federal Aviation Administration guidelines were followed during the analysis of economic impacts of airports in Missouri. Economic impacts are classified into four categories: direct, indirect, induced (multiplier), and total.

Direct Impacts:

Missouri airports create direct economic impacts based on the sales, wages, and employment generated by on-airport business activity. The data for direct impacts was collected as part of a comprehensive survey effort completed by airport management and aviation-related on-airport businesses or tenants. Common direct impacts stem from airport businesses such as fixed-base operators and aircraft maintenance providers.

Indirect Impacts:

In 2012, an estimated 6.2 million visitors arrived in Missouri via commercial service airports, and an additional 264,000 visitors arrived on general aviation aircraft. These visitors produce indirect economic impacts through expenditures on food, hotels, entertainment, recreational activities, transportation, shopping and other items. These expenditures support additional aviation-related jobs, payroll, and output. The indirect impact data was collected through surveys of visitors departing on scheduled commercial service airline flights and visiting pilots and passengers departing on general aviation aircraft flights.

Induced Impacts:

An induced impact on the economy is created by airports through the "spin-off" effect of users purchasing goods and services from other local businesses, and through workers spending wages and other income for household goods and services. This is commonly referred to as the "multiplier effect." IMPLAN, a nationally recognized input-output model, was used to quantify the induced or multiplier impacts using Missouri-specific multipliers.

Total Impacts:

The total annual economic impacts associated with Missouri airports are the sum of direct, indirect, and induced impacts.

Total Statewide Impacts

ECONOMIC BENEFITS

The economic benefits of Missouri's airports are expressed in terms of jobs, payroll, and output.

- Jobs represent the number of people who are employed.
- Payroll represents the total annual wages, salaries, and benefits paid to all workers.
- Output measures the value of goods, services and capital expenditures.

There are currently 100,621 jobs in Missouri that are in some way connected to the airport system and its activities. These jobs have an annual estimated payroll of \$3.1 billion. When all economic activities are considered, total annual economic output associated with the system of airports in Missouri is estimated at \$11.1 billion.

When this study was last completed in 2002, the aviation industry and the U.S. economy as a whole were on a positive path of recovery after the events of 9/11. Since 2002, numerous changes have occurred in the aviation industry, including American Airlines' removal of its hub in St. Louis and a drop in aviation activity that accompanied the economic downturn that began in 2007. General aviation's nature has evolved to a much higher focus on support of business and less recreational activity. Even with these changes, airports in Missouri continue to be a substantial contributor in terms of jobs. Since 2002, the output of Missouri's airports has increased by over \$1. billion, demonstrating the value of the industry to the State's overall economy.

100,621

TOTAL PAYROLL \$3,128,646,000

TOTAL OUTPUT \$11,101,699,000

For all three of the economic impact indicators, the relationship of activity directly occurring at the airports generally represents between 21 and nearly 40 percent, while visitor impacts range from 23 to 39 percent and induced or "spin-off" impacts average 38 percent of the total impact. The range of the indicators reveals that the jobs at the airports are higher paying and that aviation visitors generate a high number of jobs. The indirect and induced impacts demonstrate that, overall, for every direct job there are at least two more jobs created by the operation of the airport system in the statewide economy.

Statewide Total Airport Economic Impacts	Direct (On Airport Businesses)	Indirect (Visitor)	Induced (Multiplier)	Total
Jobs	21,400	39,213	40,008	100,621
Payroll	\$1,169,385,000	\$842,835,000	\$1,116,426,000	\$3,128,646,000
Output	\$4,148,213,000	\$2,541,803,000	\$4,411,683,000	\$11,101,699,000

Commercial Service Airports' Economic Impacts

Missouri's system of commercial service airports provides access to destinations all over the world. In 2012, nearly 12 million passengers boarded flights at one of Missouri's commercial service airports. More than 6.2 million of the passengers were visitors arriving for business, recreational, or personal reasons. The commercial service airports support a wide variety of on-airport businesses, from the airlines that carry passengers and cargo, to restaurants, rental cars, and other concessions.

In addition, these commercial service airports also generate considerable general aviation activity on a daily basis. They link general aviation users to regional, national, and international markets for both business and recreational purposes. These airports often offer fixed-base operators with services such as typical aircraft servicing, fuel, maintenance and repair services, hangar and tie-down rentals, and passenger and flight crew amenities.

Summary of Total Impacts by General Aviation Airports

Missouri's 99 public use general aviation airports support a wide variety of functions ranging from corporate travel to pilot training to recreational flying to agricultural spraying to police and fire protection. Like commercial service airports, the economic impacts stem from an airport's businesses and the aviation services they provide, as well as expenditures by visitors who use the general aviation airports. It is estimated that 264,000 visitors arrive annually to the state's public use general aviation airports. On-airport capital or construction projects also serve as a source of economic activity.

Missouri's Unique Aviation Businesses and Activities

1 H&H COLOR LAB

H&H Color Lab has served professional photographers out of its Raytown headquarters for the last 40 years. H&H Color Lab provides high quality photo printing and specialty photography products to small professional photographers located in every state in the U.S. and several other countries. The company, which prides itself on setting the industry standard for customer service, has a corporate flight department and two airplanes located at Lee's Summit Municipal Airport. The use of corporate aircraft has helped H&H Color Lab obtain its reputation for world class customer service. The company uses aircraft to deliver products in emergency or time-constrained situations, allows management to resolve issues face-to-face, and provides an opportunity to personally meet with nearly every client. In addition, flying out of Lee's Summit Municipal Airport provides H&H Color Lab executives and staff flexibility in destinations and scheduling, time savings, and convenience. The company's aircraft are also equipped with Wi-Fi to help employees work as efficiently as possible.

ZENITH AIRCRAFT COMPANY

Founded in 1992, the Zenith Aircraft Company is one of the few companies in the world that manufacture kit aircraft for sport pilot use. The unique facility in Mexico stresses high quality design and production of kitplanes utilizing state-of-the-art tools and equipment. Kit-built aviation enthusiasts from around the world come to the factory to attend workshops and try out aircraft before they purchase an airframe kit.

WINGS OF HOPE

Spirit of St. Louis is home to the World Headquarters for the Nobel Peace Prize nominee Wings of Hope, a nonprofit organization delivering humanitarian programs to the impoverished around the

world. As the largest aviation charity in the world, the mission of Wings of Hope is to help people in need of free air transportation for medical and humanitarian purposes. The organization has a crew of hundreds of volunteer pilots, mechanics, and other members that enjoy giving the gift of hope to passengers.

CAPE COPTERS

Located in southeastern Missouri, Cape Copters offers rotorcraft flight instruction, aerial photography, maintenance and repair services, introductory flights, as well as aircraft sales. Cape Copters was founded by Paul Salmon and Dean Houseman at the Cape Girardeau Regional Airport. The company offers both locals and visitors of the area an opportunity to see the world from a different perspective.

Throughout Missouri there are many aviation-related employers located at airports. Activities of these businesses and their employees are a significant source of economic benefit. Examples of on-airport businesses include:

- Airlines
- Fixed-base operators
- Air cargo providers
- Aircraft maintenance
- Aircraft manufacturers

- Rental car companies
- Restaurants
- Agricultural applicators
- Government

OZAIR CHARTER SERVICES

OzAir Charter Services offers customizable jet charter service for Springfield area businesses and individuals to over 5,000 airports throughout the U.S., Canada, Caribbean, and Mexico. OzAir began operations in 2007 at Springfield-Branson National Airport and today has a fleet of eight aircraft. The company arranges everything a passenger would need for a high-end service experience, from inflight food and beverages to ground transportation, hotels, and entertainment. These services are highly sought after by numerous businesses and others who travel by private air charter. In addition, OzAir offers aircraft management services and aircraft maintenance to other aircraft owners.

Airports Enhance Missouri's Quality of Life

In addition to their quantifiable economic benefits, Missouri's airports also add to the quality of life for residents. The airports support a wide variety of recreational flying such as soaring, parachuting, and flight training. They also provide access to numerous recreational areas of the State including hunting and fishing preserves, parks, and resort areas. Additional benefits of Missouri's airports include:

- Patient transfer to medical facilities
- Medical doctor transport
- Agricultural application
- Search and rescue

- Traffic monitoring
- Forestry
- Real estate
- Disaster relief staging areas

Various state and federal agencies use the system of airports to support:

- Law enforcement/prisoner transport
- Natural resource monitoring (pipeline, electric, etc.)
- Aerial mapping

MISSOURI AIRPORTS ARE CRITICAL TO THE SUCCESS OF LOCAL BUSINESSES

A strong aviation system in Missouri helps attract, maintain, and support business and industry growth while creating jobs statewide. Many businesses in Missouri depend on airports to efficiently move people, goods, equipment, and products. Some businesses own or charter general aviation aircraft, many have employees that travel regularly on commercial airlines, others have customers or suppliers who use the airport system to reach them, and a high number rely on air cargo and express services.

EARL'S FLYING SERVICE

Missouri is one of the top ten agricultural exporting states in the country, playing a major role in the statewide economy. Airports throughout the state support agricultural applications, which in turn support the livelihood of many farmers in the state. Earl's Flying Service, located at Steele Municipal Airport in southeastern Missouri, is a family-owned agricultural spraying business started in 1970 by Earl Lee. Earl's Flying Service sprays over 250,000 acres per year at farms in southern Missouri, northern Arkansas, and eastern Tennessee. In addition to aerial application, Earl's Flying Service is on the cutting edge of aerial application technology, assisting with the development of loading trucks, plumbing improvements to increase air flow to spreaders, the pilot-controlled hopper door, and improved gate controllers. The company also helps other aerial applicators in the U.S. by calibrating spray equipment and spreaders each year to optimize their performance.

AIR EVAC LIFETEAM

Air Evac Lifeteam, headquartered in O'Fallon, is a leading provider of air medical transportation to rural communities. Air Evac Lifeteam delivers air medical transportation services throughout Missouri and 14 other states. The company was established in West Plains, Missouri, in 1985 and today has grown to be the largest independently owned and operated membership-supported air ambulance service in the U.S. In addition, they operate the world's largest fleet of Bell 206 Long Ranger helicopters.

Air Evac Lifeteam currently operates at over 100 bases across the U.S., including the following Missouri airports:

- West Plains Regional maintenance facility
- Salem Rotor-wing air ambulance base
- Spirit of St. Louis Pilot training facility
- Poplar Bluff Fixed-wing and rotor-wing air ambulance base

139TH AIRLIFT WING AND ADVANCED AIRLIFT TACTICS TRAINING CENTER

Based at Rosecrans Memorial Airport, the 139th Airlift Wing of the Missouri Air National Guard flies C-130H aircraft. The Advanced Airlift Tactics Training Center at Rosecrans trains crews from all components of the U.S. Armed Services, as well as allies from around the world. St. Joseph's 139th Airlift Wing provides the state and nation with immediately deployable, combat-ready C-130H aircraft. The Wing's pilots and crews have flown missions in Operations Just Cause, Volant Oak, Desert Shield, Desert Storm, Iraqi Freedom and Enduring Freedom.

The MoDOT Aviation Section would like to thank Missouri airports, passengers, airport users, tenants, and stakeholders for their valuable input and participation on this project.

The preparation of this document may have been supported, in part, through the Airport Improvement Program financial assistance from the Federal Aviation Administration as provided under Title 49 U.S.C., Section 47104. The contents do not necessarily reflect the official views or policy of the FAA. Acceptance of this report by the FAA does not in any way constitute a commitment on the part of the United States to participate in any development depicted therein nor does it indicate that the proposed development is environmentally acceptable or would have justification in accordance with appropriate public laws.

- Missouri is served by nine commercial service airports in the state and 99 publicly owned, public use general aviation airports.
- Missouri's commercial service airports enplaned nearly 12 million passengers in 2012.
- Missouri supported approximately 264,000 general aviation visitors at airports in 2012.
- Airports in Missouri support more than 420 on-airport aviation related businesses.
- More than \$130 million was invested in the state's airports in 2012 through updates and renovations.
- Missouri airports support 11 scheduled commercial airlines throughout the state.
- More than 195,000 tons of cargo are transported by air in Missouri each year.
